Subject: RIN 1210-AB32

Hon. Committee Members:

I am writing to urge the Committee not to propose or approve any legislation which would inhibit my ability to make my own investment choices, or penalize any investment advisor I should select with onerous penalties or taxes. It's time to stop putting big government ahead of the individual's right to make his or her decisions. We don't need nannies—we need government to get out of the way!

Sincerely,

Ellen Besson
